Application "Dos and Don'ts"

Please make sure that

➢ **you read and understand all parts of the Call for Applications, especially the eligibility criteria** (e.g. age, citizenship requirements, Hungarian roots),

➢ you read the guide (available on https://diasporascholarship.hu/ website) for the online application system,

➢ **you check all details and requirements of study programmes in the online application system (DreamApply)** and on your chosen Host Institutions' website for details about the entry requirements of study programmes, curriculum and so on,

➢ if you are a doctoral applicant, visit http://www.doktori.hu and contact your chosen Host Institution before submitting your application, in order to discuss the available research topics and possible supervisors Make sure whether the doctoral programme you are applying for requires a statement of acceptance. (In case it is required by the doctoral programme you are applying for, a statement of acceptance issued by the supervisor must be attached to the application).,

➢ you provide precise contact details and make sure your e-mail address (and any other information) is not mistyped on your application form because all information – including the selection results – will be sent there. Please provide an e-mail address that works properly and which you read regularly; try to avoid using a Hotmail or Yahoo account because in that case letters from Tempus Public Foundation usually go to the Spam folder.

➢ **you do not accidentally apply for the wrong study levels (e.g. doctoral studies while you are a bachelor student or master studies while you already have a master degree) and do not apply to both doctoral and other study levels at the same time,**

➢ **you do not mix up the application to full degree and partial (exchange) study programme (and the length of exchange studies) as study modes cannot be altered after the application is submitted,**

➢ **if you apply for a postgraduate specialist training course, pay special attention to the requirements related to the academic advancement and to the fact that it is a non-degree program,**

➢ the documents with the correct file formats are uploaded, one file is not larger than 4 MB and all your files can be opened,

➢ you submit your application until the deadline,

➢ you did *submit* your application because saving your application will only save the content but the application will not actually be submitted,

➢ you write down and remember your login information, password and your e-mail address used when you submitted your application because you will need these information later (e.g. for accepting the scholarship), and

➢ you write down and remember your application registration number because this is how we will be able to identify your application later and this is the number that Scholarship Holders will need to use during their scholarship studies too.

We highly suggest you to

- **increase your chances of getting admitted by applying for two different study programmes (in order of preference) instead of only one,**
- **carefully decide on the order of the selected study programmes as it cannot be changed later and it is very much considered during the allocation process**
- not to apply through any agencies and pay for their services regarding the application because the Scholarship Programme is implemented by direct cooperation with the responsible authorities, not agencies.
